Dear Sir or Madam,

As I believe that I have sent you an email, I wish you keep on reading. This is a general statement for everyone I have contacted, as I have done with you.

My name is Mohammed Alkebsi and I am working as full-stack websites developer, professional digital marketer, and an English teacher. Long ago, I was flabbergasted with teachers and wanted to be one in my future. I wanted to teach the thing I loved in this life, Coding or Programming. I didn't find a chance, but I have found one for English students. I also worked as a web developer/designer for many big agencies since 2019. Breakthrough Design and Holmes Millet to mentions a couple. I was always trying to accomplish more than needed that I have also formed an agency with my brother called "Hook Studio". Through out the years, I have polished my skills through side projects, volunteer work, and extra curriculums. Up till know, I have taken about 60+ international courses from Harvard, Stanford, MIT, HPI, SPA, Google, and many others while some of them certified me, as you can see below. For the last year, I have taken about 20 international certificates and I have leveled up my English. Moreover, I have collaborated for Harvard CS50 libraries for the C language with Prof. David J. Malan, Dr.Cristfor.

All in all, after having done so much, I want to do something for my country. Teaching some guys, volunteering for people in need, working with Yemeni companies, helping or assisting in the e-learning processes, and being with creative professionals face to face.

Thanks in advance for your time and consideration,

Best Regards,
Mohammed Alkebsi

Projects

For many years, we are the best

CEO of Henkel
Carsten Knobel

Henkel

Henkel operates worldwide with leading innovations, brands and technologies in three business areas: Adhesive Technologies, Beauty Care and Laundry & Home Care.
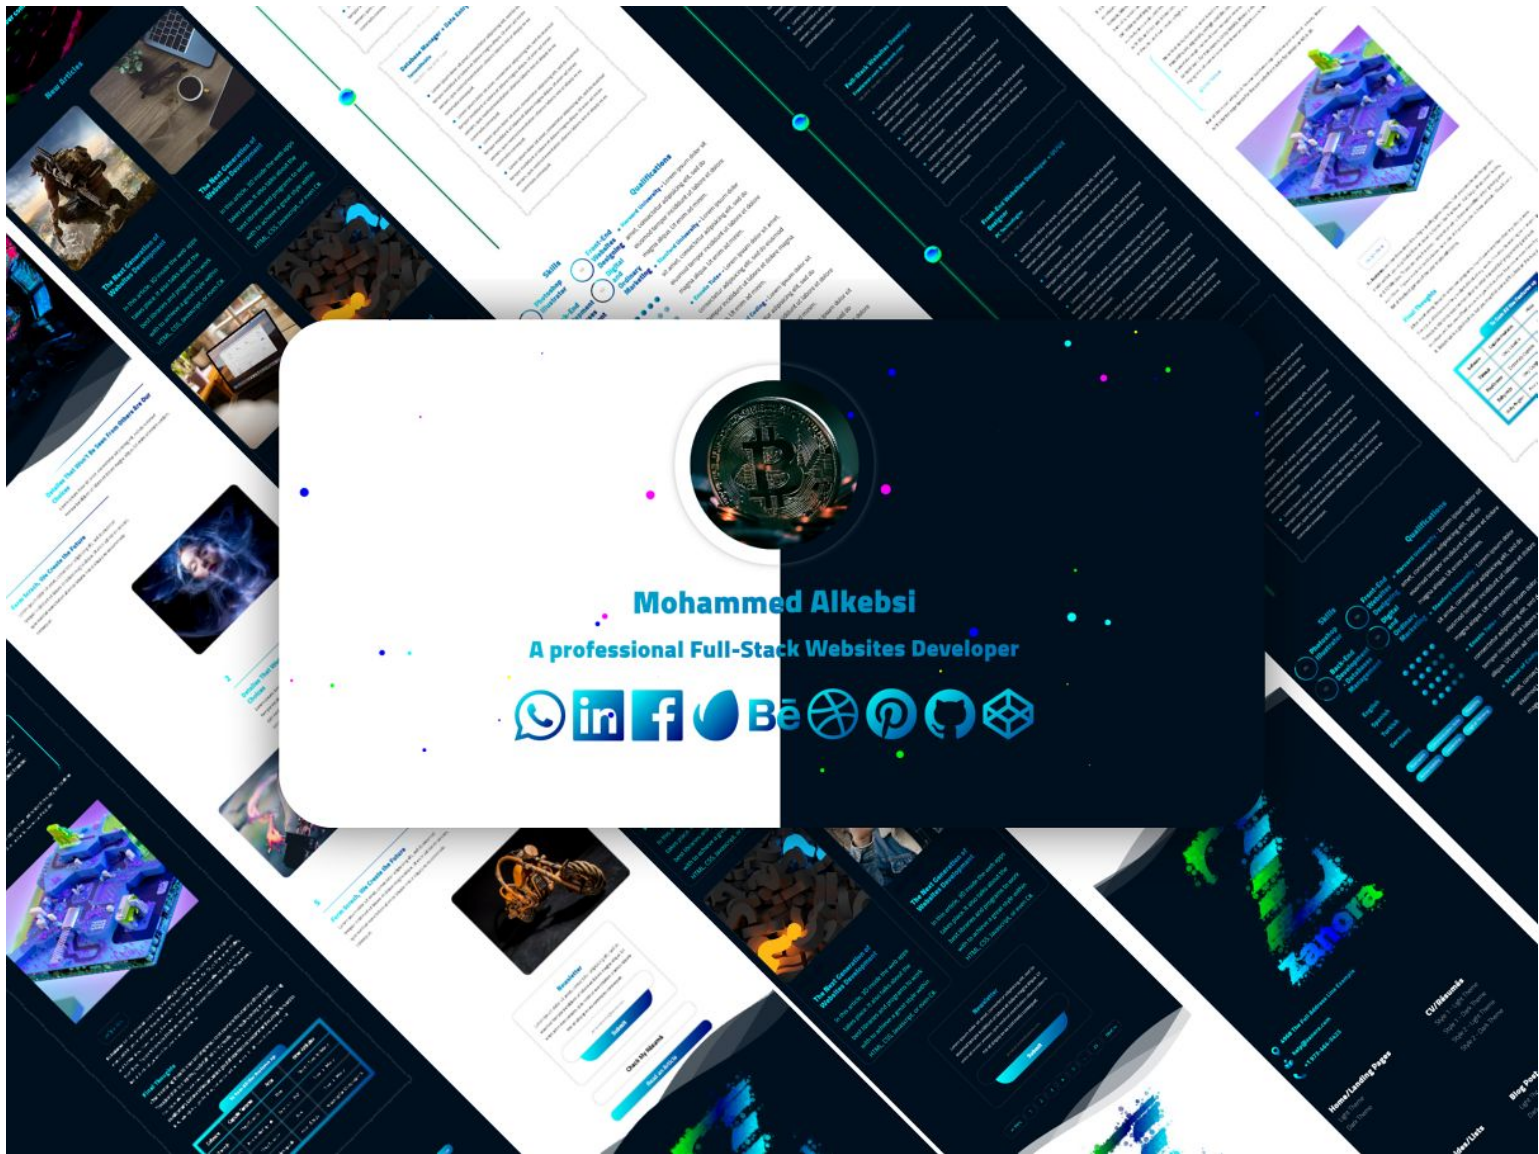

The company holds leading positions with its three business units in both industrial and consumer businesses thanks to strong brands, innovations and technologies such as **Loctite, Persil and Schwarzkopf**.

Our Purpose is built from our roots and carries a long-standing legacy of innovation, responsibility, and sustainability into the future. Our shared values and Leadership Commitments guide our decisions and actions every day. At **Henkel**, we shape our future guided by a long-term strategic framework based on our purpose, our vision, our mission and values. This framework will help us to win the 20s for **Henkel** with a clear focus on purposeful growth. This means creating superior customer and consumer value to outgrow our markets, reinforcing our leadership in sustainability and enabling our employees to grow, professionally and personally through their work at **Henkel**.

Taking responsibility, developing innovative solutions and working together – these are three important factors in shaping a sustainable transformation for our future.

Founded in 1876, **Henkel** looks back on more than 140 years of success.

Climate protection

Circular economy

Social progress

Mohammed Alkebsi

A professional Full-Stack Websites Developer

I have put some of my previous work so that you can get a fast, not interactive look at my work. Interactivity of those sites are amazing and words can't describe them. Wish you had a chance to see them all since some are still in my laptop, but I will be able to bring them in the interview. You can see my personal website, image number 1, at https://alkebsi.github.io - and sizillion, image number 2, at https://alkebsi.github.io/sizillion since it was the final project for Harvard CS50. The others are great and professional, too, but you know how is the Internet in Yemen these times, especially in Heziaz. You may see a further information about those at my site, portfolio section, https://alkebsi.github.io/portfolio.html. I think that there is no need to describe things more than this.
